NOTE: data preceded by an asterisk are inferred, usually from contemporary documents

EXPLANATION OF COLUMN HEADINGS

REG#	=	Government Registry Number, assigned by ordnance officer inspecting
INSP	=	initials of inspecting ordnance officer
FDY#	=	internal foundry control number
YR	=	year of manufacture or acceptance
GRVS	=	number of grooves in bore of rifled tube, indicating if right-hand or left-hand twist

This is a living document in that the data base from which it is printed is maintained on an almost daily basis. Information on cannon not listed herein, additional markings, relocations, corrections of mark reading or entry errors, etc. are most welcome and encouraged. Without input from many people, the accuracy of this register cannot approach perfection. Current printouts, including any sort desired, are available on request for a modest charge to cover printing costs.

Persons utilizing this listing are reminded that the locations noted herein are those where the cannon were last seen by, or reported to, the compiler. Sales, purchases or trades by private individuals, cemeteries, and various municipalities and government agencies routinely occur. The circumstances of a change in the ownership of a specific cannon are frequently not reported to the compiler. Users of this listing should be aware that a cannon listed herein as at a public location and later seen in private hands does not necessarily indicate an unlawful action has occurred. Cannon known to be stolen are listed as such in the comments column.
